

# Your Safety is our priority!

## Factory-tours at Mercedes-Benz in Bremen

### *Before it starts:*

Please notify us if you have any health restrictions (for example a pacemaker or similar).

Please notify us if required!

For safety reasons the plant tour is not recommended for children under 6 years of age. If as a parent or legal guardian you still wish to take part, we ask that you carry children who cannot walk independently and hold the hands of older children.

As you will be on foot once inside the production hall we recommend that you wear sturdy and comfortable shoes.

Pets cannot be taken on the plant tour.

Cellular phones can severely disrupt the production process and should be turned off.

Please note the smoking ban in the coach and in the production hall.

The entire visit to our production hall requires your fullest attention. We therefore ask that you refrain from alcohol or other narcotic substances before your visit.

### *During the factory-tour:*

Taking pictures and making sound recordings is not permitted in the plant except in the customer center. During the plant tour you can leave your cameras and mobile phones in our secure lockers in the customer center.

Welding and grinding work in the bodyshop causes flying sparks that are dangerous to the eyes and can cause burns. Please wear the protective eyewear you were issued with throughout these areas.

Please adhere to the instructions of your tour guide at all times and stay close to your group.

Under no circumstances should you remove parts from any of the containers that stand by the production areas.

Please do not cross any lane markings on the floor and to look out for crossing fork-lift trucks, trucks and bicycles.

Under no circumstances should you enter the work areas of people or machines (robots and conveying systems).

## We wish you an interesting factory-tour with many memorable moments!
